// Summary

Full stack developer who builds custom systems starting from the real pain of the business. Working in tech since 2022, from front end (React, Next.js) to back end and data (Node.js, Python, SQL), automation, web scraping, payments and AI customer service on WhatsApp. I work end to end: discovery with the client, solution design, development, deployment and ongoing support.

// Projects and clients

Abdou's Barber Subscription barbershop, Guarulhos, Brazil 2026

- Complete management system in production: brand website, client area, per-barber scheduling, subscription plans, online store, tabs, register and finances.
- AI WhatsApp bot working 24 hours a day: books appointments, sells products, generates payment links and notifies the waiting list when a slot opens.
- Outcome reported by the owner: more clients and more subscribers, no more paper schedule or lines at the door. 411 commits in 6 months.
- Produced a 16-minute documentary with the owner and clients showing the before and after.

`Next.js, TypeScript, Fastify, Prisma, PostgreSQL, AI, Docker, Coolify`

Tô na Porta Food delivery in Lençóis, Chapada Diamantina, Brazil 2026

- Three-sided delivery marketplace (client, store with kitchen screen, courier with routing) in a town with no delivery app.
- Pix and card payments via Mercado Pago with automatic platform commission, real-time orders over WebSocket, push and WhatsApp notifications.
- Also designed the brand identity and mascot.

`Next.js, Fastify, Prisma, PostgreSQL, Mercado Pago, WebSocket`

Psy Trekking Trekking agency, Chapada Diamantina, Brazil 2026

- Website in 4 languages with routes, departures and booking, plus a financial dashboard for guides and a queue of WhatsApp leads.
- Lighthouse mobile scores of 93 to 100 in production; 100 on accessibility, best practices and SEO.

`Next.js, Fastify, PostgreSQL, Docker, i18n`

Casa Cheia Housewarming gift registry 2026

- Registry where the host's apartment fills up with each reserved gift, using AI-generated scenes, an admin dashboard and email reminders.

`Astro, SolidJS, Netlify Functions, Gemini, Resend`

// Experience

Junior Full Stack Developer Ridolfinvest — Dec 2024 to Apr 2026

- Grew a certificate automation into the company's internal tool hub, with authentication and session control.
- Automated forms with login, 2FA and per-user sessions: the flow went from about 15 to 5 minutes.
- Bots and integrations with Brazilian federal and state courts, including OCR value reading and cookie, token and session maintenance.
- Document generator with templates, variable extraction and version history.
- Document sweep and recovery that recovers over 300 opportunities per week.

Development Intern Ridolfinvest — Mar 2024 to Dec 2024

- Operational automation, data scraping and integration routines with Python and SQL; promoted to developer in nine months.

IT Apprentice Totale Tecnologia — 2022 to 2024

- Hardware maintenance, software installation and configuration, and user support in a corporate environment.

// Education

MBA in Software Engineering University of São Paulo (USP/ESALQ) — since Nov 2025, in progress

Associate degree in Systems Analysis and Development FIAP — completed 2024

// Skills

Front end	React, Next.js, TypeScript, JavaScript, Astro, SolidJS, Tailwind, HTML, CSS
Back end and data	Node.js, Fastify, Python, Prisma, PostgreSQL, SQL, REST APIs, WebSocket
Integrations	WhatsApp, generative AI, Mercado Pago, PagBank, Resend, OCR, web scraping
Infrastructure	Docker, Coolify, VPS, Netlify, Git, GitHub
Product and design	Client discovery, Figma, prototyping, brand identity

// Languages and courses

Portuguese: native. English: currently learning. 29 certified courses in React, JavaScript, Python, Figma, Git and Power BI.
